

ANDRÉS DAVID RINCÓN SALAZAR

Full Stack Developer | Angular · NestJS · TypeScript

Colombia (UTC-5) · Open to remote contract, freelance or part-time work (20+ h/week)

andresdrincons2007@gmail.com · linkedin.com/in/1594-adrs · github.com/1594-adrs · 1594-adrs.github.io

SUMMARY

Junior full stack developer building Angular and NestJS applications in Scrum teams at Universidad Tecnológica de Pereira. Works with TypeScript, Oracle, PostgreSQL, Git and CI/CD. Interested in full stack roles and AI code evaluation.

EXPERIENCE

Software Development & Support Monitor (part-time contract)

Feb 2026 – Present

Universidad Tecnológica de Pereira — Pereira, Colombia

- Develop and maintain internal web applications with Angular and NestJS on Oracle and PostgreSQL, working in Scrum teams with Git workflows and CI/CD pipelines.
- Contributed to the UI refactor of UTP Móvil, the university's Flutter mobile app.
- Built internal tooling that automates parts of the team's Scrum workflow.

Freelance Web Developer — AF Autoservice

2026

- Designed, built and deployed the website of a mobile auto-repair business in Colombia's Coffee Region using Astro, with on-page SEO and Vercel hosting; client reported positive results. af-autoservice.vercel.app

PROJECTS

Graphing Calculator — Angular, TypeScript, Canvas, Three.js. Built a browser graphing calculator with a recursive-descent expression parser, adaptive Gauss–Kronrod integration and 3D solids of revolution; math engine unit-tested.

Portfolio — Angular 21. Built with standalone components, signals and lazy routes; prerendered and deployed to GitHub Pages through a GitHub Actions pipeline (typecheck, tests, build).

PrereqFlow — Python, Streamlit, PyVis. Modeled a 64-course, 10-semester curriculum as a directed acyclic graph with interactive visualization, semester planning and what-if simulation; 50 unit tests with pytest.

CSV2Binary-DBMS — C11. Implemented a file-based DBMS that converts CSV data to binary and runs file-based sorting, searching and reports without loading full datasets into memory.

RacketChess — Racket. Implemented chess move validation and check/checkmate detection using pure recursion and immutable data.

SKILLS

Languages: TypeScript, JavaScript, Python, C, SQL, Dart

Frontend: Angular (signals, standalone components), Flutter, Astro, HTML, CSS

Backend: NestJS, REST APIs, JWT, OAuth

Databases: PostgreSQL, Oracle

Tools & practices: Git, GitLab CI/CD, GitHub Actions, Scrum, unit and e2e testing, LLM tool-calling agents, MCP; basic Linux VPS/VM setup

EDUCATION

B.S. Systems and Computer Engineering — Universidad Tecnológica de Pereira

Feb 2025 – Expected 2029

Systems Technician — SENA

2023 – 2024

- Winner, Tecnoferia 2024 ("S.O.S-Tenibilidad" project)

CERTIFICATIONS

Python Developer · Generative AI Usage · Prompt Engineering · Data Analysis with AI

LANGUAGES

Spanish (native) · English (B2 reading and writing)
